

Story Corner

Superboy's First Day of School

This story is about a boy called Jack. He and his family just moved into town. He is not just an ordinary boy. He has special powers. He can fly and is very strong because he can pick up a whole building! But he has one bad thing which is that he is very fat. He has a big round tummy. He loves to eat fast food, especially hamburgers.

On his first day of school, he was very excited so he couldn't sleep the night before. When he walked into the classroom, all his classmates stared at him in shock. One of the classmates said rudely 'Oh my goodness! Look at his stomach. It's as big as a basketball!' Everybody laughed at him. He felt very sad.

One night, when his parents were watching the news, he saw there was a jelly monster destroying the city. He quickly changed into his suit. He put on his mask and cap and flew out from his bedroom window. Jack saw many people running and screaming on the street. They were scared of the jelly monster. It had ten long slimy tentacles flying all over the place. Many buildings collapsed and the city was in chaos!

Then Jack grabbed the jelly monster by two of its tentacles and threw it into the sea, but it didn't die. So Jack pulled its tentacles out one by one. The frightened jelly monster swam as fast as a rocket but it left the tentacles behind.

In the end, everyone cheered, 'Hooray! Thank you Superboy!' Jack took off his mask. His classmates were shocked to see it was Jack who saved the world. The classmates learnt that they should not judge a book by its cover. They all became good friends. Then Jack said 'We can have a barbecue with the tentacles!' Everyone was happy!

Kian Cheuk

The First Soldier - The War of Chaos

Once upon a time, there was a kingdom of evil. There was a king called Gul'Thak. He ruled the kingdom in a cruel way. Two centuries passed under his rule before he had the ambition to rule the human world. He started to run amok on Earth, the lost dimension and Asgard, until a young hero named James saw a poster about army recruitment. He knew at once what he had to do...

After his interview, James joined the army and accepted to inject blood serum into his body. He became much stronger. Eventually, he started to fight with the evil army using his justice rifle and lightsaber. During his travels, he acquainted himself with a lot of allies like elves, gnomes and the Ironhammer, who all joined his fight against the dark side.

Throughout the almost endless war, James and his allies walked into the Dark Tower, at the heart of Gul'Thak's dark city, and tried to shut down the CPU. Without the CPU, the dark side would be powerless. They didn't encounter any enemies defending the entrances. They were surprised, but it was a trap set by Gul'Thak!

James tried to shut down the CPU while his allies defended the entrances simultaneously. 'BOOM!' there was a blast wave that shook the whole Dark Tower! James was injured. He had lost too much blood. He felt dizzy and eventually died. After that, everyone attended his funeral and eulogized him forever.

One year later, the story of James' bravery gave the whole human world and its allies hope. They never gave up, despite the enormous threat. They used their superior intelligence to create a new type of nuclear warhead. They dropped the warhead over the city and it was quickly destroyed. The evil king Gul'Thak was arrested by the MI5 and FBI and put in a high security jail.

Now there is no more evil in the universe.

Healthy Living

We asked our fellow students some questions about healthy living. Even though fast food is usually very unhealthy, the results show most students enjoy eating it! However, a very large number of pupils also like to play sports. Exercise is important for a healthy lifestyle!

Do you like to eat fast food?

Do you play sports?

Do you like fast food? I think most people like it, and I do too! But some people ask the question, 'Are there too many 7-11 stores and McDonald's restaurants in Hong Kong?'

Yes, we always go to these two places and we love their food, but eating too much fast food is bad for us. In McDonald's, we have hamburgers, French fries, cola and ice cream. All are fast food! These fast foods have so much oil and sugar in them. You can eat them sometimes, but try to eat less.

Most 7-11 stores have a snack counter now. It sells fish balls, sausages, noodles, udon and shumai. Some of them have so much salt and oil in them. It's unhealthy! Also, we can buy some dim sum or spaghetti and use the oven to make it hot. It's easy! It's not that bad but I think we need to eat more fruit and vegetables.

Lastly, I think there are too many 7-11 stores and McDonald's restaurants. They are bad for us. The food has so much oil, salt and sugar in it, so I will try to eat less. I will eat more healthy food. What do you think?

Activities

School Choir

Our school choir is good. We are happy in the school choir because we can meet a lot of friends. We can sing a lot of songs in this club. We can listen to other singing clubs too. When we are tired, we can drink some water or go to the toilet.

This year, our school choir won 3rd prize in a singing competition. Our teachers are very happy. Sometimes, if we win, we can have a pot-luck party. We can eat a lot of food at this party, such as chicken wings, potato chips, sweets and sausages. I like this club very much.

Christy Wong

Basketball Club

My favourite extra curricular activity is basketball. It can help us be more healthy and teach us how to perform the sport well. Also, we can make new friends!

One day, my class teacher, Mr Leung, invited us to join the basketball class. I was so scared because I thought the people in this group would be so rude. But they are nice and kind so I feel very glad. Mr Leung teaches me a lot about basketball. I know a lot about the sport now.

Although it is hot, we always play basketball in the playground. It's so hot! I want to play basketball in a place that has air conditioning. Also, I will join the competition with my team members. Some are older than me and some are younger. I have made friends with all of them.

I have learnt a lot of things. I want to play basketball for the rest of my life. I want to thank Mr Leung and Mr Wong because they taught me how to improve my basketball skills. How about you? What extra curricular activity do you do? Let's tell our friends!

Table Tennis Club

I have a table tennis class after school on Monday and Friday. It is a one hour lesson. Mr Gao teaches me. I like it because it can make me healthy. I have played table tennis since Primary 1, three years ago. I think it is interesting.

I like sports very much. My teacher, Mr Gao, is very nice to me because he is kind. He sometimes buys drinks for me. Table tennis is fun!

By Amy Huang

Table Tennis Club

My favourite extra curricular activity is playing table tennis. I started playing table tennis when I was six years old because my mum told me I should learn to play this sport.

I like this activity because I can learn how to play it and I can learn how to improve my game and I can make some new friends. That makes me very happy.

I always play table tennis in the school hall for one hour with my friends and my table tennis teacher. Although I am usually happy, sometimes I can get sad if I lose. Then my friend will feel angry.

I still love this extra curricular activity. hope I can play table tennis all the time!

Activities

STEM

My extra curricular activity is STEM. That stands for science, technology, engineering and mathematics, but sometimes we just call it Robotics Team! In this class we can learn how to use Lego to do some challenges. Moreover, we can do some experiments about hydro dynamics.

In March, Robotics Team went to a competition about hydro dynamics. I was a member of this robotics team. I know how to win the competition. Do you know? We had to use a robot car to finish the missions. There were eighteen missions. Then, we needed to introduce the car. Finally we needed to do a project about hydro dynamics.

In this competition, we got a score of 105 for using the robot car. Another school got a score of 495! It was the highest score in Hong Kong. Then, we introduced the robot car. Although we didn't win any prizes, I thought we did very well.

For the project, we told the judges about how to recycle water. The judges said, 'You did very well. maybe you can get a prize in this section.'

When all the schools finished the competition, the judges announced the prizes. I was very sad because we didn't get any prizes, but we learnt lots of things about team work and STEM. We will try again next time!

Now, we have a new mission. The chancellor gave us \$100,000 to buy some Lego. Then, we will give the Lego models back to him because he wants to build a toy museum.

Otto Wong

Journalist Club

This year I joined the Young Journalist Club every Thursday. It takes one hour after school. In every class, we usually complete one writing task. I think it is good because we can improve our grammar and learn more words.

It's interesting because this extra curricular activity can help me make a lot of friends. It's pretty good. I joined the lessons with my friends and we improved our friendship I think.

Some people don't like writing, but I think it is interesting and useful! Not everything can be perfect!
