## The Thirtieth Anniversary of our School

### Anniversary Performance at Tuen Mun Town Centre

Our school is 30 years old this year. I cannot imagine what I would look like when I am 30 years old. However, our school is still very

young. She looks like a mature beautiful lady.

I grew up in Wu Siu Kui. I am now in P5. Wu Siu Kui is a very good study environment with many good teachers. I remember

when I was in P1, I was scared of the environment because I knew nobody and I did not want to go to school. However, my class teacher was patient and gave me confidence...

## Fun school events

-Casey Wong 4B

To celebrate the 30th anniversary our school-mates, teachers, and staff have done many things. We had a drama performance, kung fu

demonstration, modern dance, traditional dragon dance, poem recital, and singing performances in the Tuen Mun Town Hall. The performances were amazing and meaning-

ful. My favourite performance was the drama because it was great. I think everyone was happy with that performance. In the second term we will also have so much fun!

# An Interview with our Principal, Mr. Kwong by Natalie Li 6A

*Natalie: What is your favourite school activity?*

**Mr. Kwong:** My favourite activity is running because it can keep me healthy... and I would like to win. I would like to be the first [chuckles happily]. My strength is sprinting.

*N: What are you proud of your students?*

**K:** I am very proud of our pupils' conduct and discipline. They obey their teachers and their parents. They listen to them. They have good discipline.

*N: What do you think about our school's students?*

**K:** Our school's students are bright, clever, obedient, and disciplined.

*N: How can we improve the teacher/student communication?*

**K:** To improve your communication in English, first you need to have enough input. That means you must

read more, from newspapers and books, so that you can have much to

**Mr. Kwong and Natalie Li**

talk to one another. So the main point is to read more, then you can communicate better.

*N: What was your favourite 30<sup>th</sup> anniversary celebration event?*

**K:** The events that I loved most were the chorus singing, dancing, and rope skipping. But on the whole, all the events for our anniversary were wonderful.

*N: What do you like to do in your spare time?*

**“I am very proud of our pupils conduct and discipline”**

**K:** In my spare time, I like to have a gathering with my family members, my wife and children. It could be anywhere, just to have time to have a family day with a meal in a restaurant, a film in a cinema, or maybe a trip.

*N: What is your favourite colour? Why?*

**K:** My favorite colour is blue. I love it but I don't know the reason. Many questions or many answers may not have a reason if you have a strong feeling.

Gangnam Style at the Gala

*Anniversary continued from cover page.*

Now, I like going to school because my teachers are kind and my classmates are friendly. I study happily in our school.

I will always remember Wu Siu Kui. After I graduate, I am sure I will come back to visit the school.

I hope our school would be the most successful school in Hong Kong.

-Jenny To 5B

## Sports Day Reporting

-Raymond Law 6A

Sports Day is a big day of competitions in the Tuen Mun Tang Siu Kin Sports Ground. There are many events including the: 60, 100, and 200 metre races, high jump, long jump, softball throw, and relay race. The 60 meter race is a com-

mon international event and can be run in one breath. The world record time is 6.39 seconds! Nobody ran that fast on Sports Day, but I did have a chance to interview many athletes and some teachers. Most students felt very tired after the races because they tried very hard, and

everybody had fun!

(See Raymond's interviews on the upcoming *English Channel!*)

Eason Ng is ready for softball throw

## Feature: Fun Fair

Our school's Fun Fair was a happy experience for all. It was in the school hall and playground on a sunny Saturday this year. There were many stalls with interesting, easy, hard, and fun games.

Teachers sat at the stalls with some P.5 and P.6 students to tell others how to play the games. Some students and their parents were playing together in every stall. After that they went to claim different prizes in exchange for their filled-out chop card. Then

they could play any games they wanted again, but could not get more prizes.

I asked some students questions during the fair. Many students felt excited and happy. A lot of students liked the computer stall the best, even though they thought it was not easy. And everyone liked the prizes!

-Virginia Wu 5B

Fun at the Fun Fair!

## A New Computer Room for our Lucky School

Computers are helpful for learning and students love to play games on them. Our school introduced a new computer room this year. It can accommodate about 30 students in this room. There are more than 30 new computers, as well as projectors, speakers, and a multimedia controller. Teachers

can now teach courses that add in-

The S.T.F.A. Board Member Sponsors

teractive elements. I wish there were more computer rooms in all schools. In the old days, learning without multimedia equipment was much different. I would like to thank all the people that made the computer room possible.

-James Yeung 4B

## Feature: Phoneaholics, are you a phoneaholic?

- Steven Lau 5A

Nowadays, Hong Kong has a new view. When we are walking on the street, riding on the train or bus, or just sitting in a restaurant, we can always see people touching their phones. They are usually smartphones, and the most popular now are iPhone, Samsung, and HTC. They are very stylish. They are lighter and thinner than traditional phones too. These smartphones not only can call, but can also be used to take photos,

play games, chat with friends, and even surf the NET. They give us a lot of convenience.

Handmade iPhone by Hugo Wu

However, smartphones have a bad side. Usually when I have dinner with my relatives, my cousins will talk to me and play games. When we

have smartphones, we only play phone games and surf the NET. We

ignore our family. This is wrong, we should use smartphones at the right time.

With each passing day smartphones will become more and more advanced, this would never be a reason to miss out on quality family gathering opportunities. Phones are made for communication, we can surely use them to improve our lives without damaging our communication.

# Opinion: The most Interesting Place in Hong Kong Disneyland vs. Ocean Park

-Virginia Wu 5B

I think Ocean Park is the most interesting place in Hong Kong. There are sharks, fish, jellyfish, dolphins, and pandas.

Ocean Park is on Hong Kong Island. We go there by bus, taxi or car. The Ocean Park symbol is a seahorse which is very special.

First, I like to plan to go to the aquarium to see sharks, fish, etc. There are many different animals. Then I will go to the panda hall to visit the pandas. After that I will ride on the cable car to other areas. I like to watch the dolphin show, it is fantastic. At the end, I will go to watch the water show in the central park.

I think Ocean Park is the most interesting place in Hong Kong.

-Jasmine Fung 5B

The most interesting place in Hong Kong is Disneyland.

I have been there once. There are many interesting rides to go on. I love the rides in Tomorrow Land. Although they make me dizzy, I think they are great.

In Main Street U.S.A. there are many things to buy: dolls, clothes, exquisite articles... you can find everything you expect. At Adventure Land I went to Tarzan's Tree House. That day was hot, but the tree house was cool. I saw Liki Tikis too, the totem poles could spritz. I got all wet, but it was cool! If you want to go there, you should also visit Grizzly Gulch. You can also ride on the Runaway Mine Cars, and Soldier Parachute Drop.

I think Disneyland is the place for my next birthday. Do you want to go? Join me!

## A Note From Mr. Brad

*It has been a pleasure to teach at Wu Siu Kui for the past two years and to be here for the thirtieth anniversary. The students at our school are truly inspiring. They are smart, respectful and hard-working. I think that every student here has a bright future and a world of opportunity that awaits them beyond our school. I can't wait to hear about the lives that they lead in the future. The teachers and staff are equally inspiring. We all do so many things for each other and the school. I hope the best for all and happy anniversary to Wu Siu Kui!*
